Dear Putu Doddy Heka Ardana.

The manuscript entitled " The Stable Isotopes Approach as Tracers to Investigate the Origin of Groundwater In The Aquifer of Denpasar Plain Region, Bali ", which you submitted to the journal Acta Montanistica Slovaca (AMS), has been reviewed. A decision of the review process can be found in an attachment to this email.

Reviewers and editors have major concerns about the manuscript. Thus, the manuscript in the current version is not suitable for publication in AMS.

Please, consider all comments and suggestions, and we look forward to receiving your revision.

Keep in mind that any changes to the manuscript should be highlighted in yellow, such that any changes can be easily viewed by the editors and reviewers.

Please provide a cover letter to explain, point by point, the details of the revisions to the manuscript and your responses to the reviewers' comments.

If you feel that it is not possible to address certain comments, please provide an explanation in your rebuttal.

Please check all the essentials of the manuscript according to the journal template (including references): https://actamont.tuke.sk/Template_AMS_2021.doc

The revised version will be sent to editors and reviewers.

If you have any questions, do not hesitate to contact us.

Have a nice and successful day.

Best regards,
